It has won top spot in the E50 awards for two years running, report GUAN MEISI, LEE KANG HAO and LIM JIA YING

Samwoh’s road to the top

Samwoh has come a long way from its humble beginnings as a logistics and transport company to a major player in the building materials sector. In 2010, it was awarded the E50 award, which is considered the pinnacle of excellence in the Singapore construction industry.

Samwoh was founded in 1975 by Tan Hwee, who envisioned a future where the construction industry would be more efficient and sustainable. He started with a small factory and a few employees, and gradually expanded his business through innovation and hard work. Today, Samwoh is a leading player in the building materials sector, with a turnover of over $1 billion and a workforce of over 1,500 employees.

Samwoh has diversified its business over the years, entering into new markets such as the production of green building materials. The company’s commitment to sustainability has led to recognition and awards, including the National Environment Award (NEA) and the Green Mark Award. Samwoh has also been involved in several high-profile projects, such as the National University of Singapore’s new campus and the Marina Bay Sands project.

The company’s success can be attributed to its strong focus on customer satisfaction, innovation, and commitment to quality. Samwoh has a reputation for delivering high-quality products and services, which has helped it to maintain strong relationships with its clients.

Looking ahead, Samwoh is poised to continue its growth and success, with a focus on innovation and sustainability. The company’s commitment to these values will help it to meet the challenges of the future and remain at the forefront of the building materials sector.
